-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The preliminary amendment filed April 12, 2004 has been acknowledged.

Drawings

The photographic drawings have been approved.

Objection to the Disclosure

37 CFR 1.163

The following is a quotation of section (a) of 37 CFR 1.163:

(a) The specification must contain as full and complete a disclosure as possible of the plant and the characteristics thereof that distinguish the same over related known varieties, and its antecedents, and must particularly point out where and in what manner the variety of plant has been asexually reproduced. In the case of a newly found plant, the specification must particularly point out the location and character of the area where the plant was discovered.

35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

In plant application filed under 35 U.S.C. 161, the requirements of 35 U.S.C. 112 are limited.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

As specific to United States Plant Patent applications, the specifics of 37 CFR 1.164

(reproduced below) are controlling:

Art Unit: 1661

The claim shall be in formal terms to the new and distinct variety of the specified plant as described and illustrated, and may also recite the principal distinguishing characteristics. More than one claim is not permitted.

In plant applications filed under 35 U.S.C. 161, the requirements of 35 U.S.C. are limited. The following is a quotation of 35 U.S.C. 162:

No plant patent shall be declared invalid for noncompliance with section 112 of this title if the description is as complete as is reasonably possible. The claim in the specification shall be in formal terms to the plant shown and described.

The disclosure is objected to under 37 CFR 1.163(a) because the specification presents less than a full and complete botanical description and the characteristics which distinguish over related known varieties.

More specifically:

A. Page 1, line 5, the specific epithet of the instant plant should be changed to read -- sp. -- (specie) because the parents are unknown. On page 2, lines 7-15 and page 4, lines 14-16, Applicant states that the origin is uncertain and most closely resembles a Nuttall Oak but is not positive.

B. Applicant should set forth in the specification the vigor or average rate of growth of the instant tree at a given time of culture.

C. Applicant should set forth in the specification the lenticel's average size, shape and color designation with reference to the employed color chart in the interest of providing as complete a botanical description of the plant as is reasonably possible.

Art Unit: 1661

D. Applicant should set forth in the specification a botanical description of the branch such as surface texture and color designation with reference to the employed color chart at a given time of culture.

E. Applicant should set forth in the specification a botanical description of the petiole's average length, surface texture and color designation with reference to the employed color chart.

F. Page 5, line 10, the recitation "Overall shape: Needle-like" is unclear because Figures 3, 4, and 5 does not show a needle like leaf. Clarification is necessary.

G. Page 5, line 14, the recitation "ash-gray to brown-gray" does not sufficiently describe the color designation with reference to the employed color chart of the buds. Correction is necessary.

H. Applicant should provide a photograph of the acorn since it is the most distinguishing characteristic that determines the differences between oak species (see page 2, lines 8-10).

I. The Royal Horticultural Society Dictionary of Gardening and the Preston reference disclose that *Quercus nuttallii* and *Q. palustris* are very similar but *Q. nuttallii* has tufts of yellow hairs on the underside vein axil. If the claimed cultivar has some of the characteristics of *Q. nuttallii* then such information should be disclosed in the specification.

Art Unit: 1661

The above listing may not be complete. Applicant should carefully compare the claimed plant with the botanical descriptions set forth in the specification to ensure completeness and accuracy and to distinguish the plant within this expanding market class. Any further botanical information should be imported into the specification, as should any additional or corrected information relative to same.

Claim Rejection

35 USC § 112, 1st and 2nd Paragraphs

Claim 1 is rejected under 35 U.S.C. 112, first and second paragraphs as not being supported by a clear and complete botanical description of the plant for reasons set forth in the Objection to the Disclosure Section above.
